

Guide to the NDAA Match and Series result templates

Introduction

There are two templates associated with NDAA match results. The first template is used to capture the result of a specific NDAA match. This template provides various layouts associated with displaying the result on Facebook and a summary of the match result for input into the second result template which captures the result of a series of matches.

Both templates are Microsoft 365 Excel spreadsheets which will be shared via OneDrive.

Both templates have been defaulted to be read only to ensure they are not overwritten.

Please use **Save As** to copy the template into a file associated with the specific NDAA match e.g. *2026 Pairs League R1.xlsx*, *2026 Marbella Cup.xlsx*...

or the specific Series result e.g. *2026 Pairs League*, *2026 Pairs Festival*, *2026 Three Rivers Festival*...

This guide explains how to use each spreadsheet with instructions for each of the worksheets, within each spreadsheet, shown in the expected order of use.

Match result template

Quick guide to the match result template

Match Info worksheet

This worksheet captures information about the required NDAA match. This sheet has two groupings of data:

- the information relating to the match and its scoring
- the sections to be used in the match.

The following sections describe these groupings and their purpose.

Match information

A	Select match	Pairs League Round 6
B	Date	21 August 2025
C	Match type	Pairs
D	Series instance	Round 6
E	Zone count	2
F	Set team ranking basis =	Section
G	Set max section points =	7
H	Set max zone points =	
I	Set section payout =	2
J	Set zone payout =	
K	Set match payout =	5
L	Set team/pairs payout =	4

REF	GUIDANCE	DROPDOWN SOURCE
A	Select the required match from the dropdown list.	List of matches sourced from Table in the Parameters worksheet.
B	Date of match populated from data selected in A .	Date of match sourced from Match List Table in the Parameters worksheet.
C	Match type populated from data selected in A .	Match type sourced from Match List Table in the Parameters worksheet.
D	Match instance populated from data selected in A . Used to determine whether max section points should be set.	Match instance sourced from Match List Table in the Parameters worksheet.
E	Zone count derived from sections (see next section). Used to determine whether to Hide zone column on Display Result A-D worksheets.	
F	Select team ranking basis from dropdown list; choose from section, zone or weight. This data is used to determine the Team/Pairs placings for this match. Note that this may differ from the basis used to score rankings across the series/league.	List of team ranking bases sourced from Table in the Parameters worksheet.

REF	GUIDANCE	DROPDOWN SOURCE
G	Set max section points; used for matches where result is derived on section points; set to lowest section attendance. This information is expected for matches running across multiple days/rounds (except for Team events).	
H	Set max zone points; used for matches where result is derived on zone points; set to lowest zone attendance. This information is expected for matches running across multiple days/rounds (except for Team events).	
I	Set section payout. This information used to show section placings in Display Match Result A-D worksheets.	
J	Set zone payout. This information used to show zone placings in Display Match Result A-D worksheets.	
K	Set match payout. This information used to show match positions in Display Match Result A-D worksheets. Showing this information, when there is no individual payout, is useful to people when viewing on Facebook (helps people identify the most productive areas to fish).	
L	Set team/pairs payout. This information used to show team/pairs result on the day in Display League Result 1-2 worksheets.	

Section information

This worksheet also captures the section information which will automatically be linked to the anglers' results, when entered, and then used on the various results calculation and display worksheets.

Section Id	Zone	Section Label	Display Section	Section River
M 1	N A	Martham Candle Dyke/Boat Green	O A1 P	Thurne Q
2	A	Martham Ronds	A2	Thurne
3	A	Martham High's Mill	A3	Thurne
4	B	Potter Heigham Stagings	B1	Thurne
5	B	St Benets Front of Abbey	B2	Bure
6	B	St Benets Black Sign	B3	Bure

REF	GUIDANCE	DROPDOWN SOURCE
M	Section Id. Prefilled values 1-18.	
N	Select Zone from dropdown list. This data is used to denote zones for rotation across multi-day events or zones for Team/Pairs matches. If not required, default to A .	List of Zones sourced from Table in the Parameters worksheet.
O	Select Section Label from dropdown list.	List of sections sourced from Table in the Parameters worksheet.
P	Set the Display Section. This information is used as a section label when displaying section results in various worksheets. For most matches this is usually derived by concatenating the Zone and a section reference e.g. A1, A2, B1, B2... Exception is where there are multiple Leagues, then factor in the League names plus a section number.	
Q	Section river populated from data selected in O .	Section river sourced from Section List Table in the Parameters worksheet.

Example Match Info - 2025 Teams of Four

Select match Teams of Four Round 4

Date	24 August 2025
Match type	Team
Series instance	Round 4
Zone count	4

Set team ranking basis = Section

Set max section points =
Set max zone points =

Set section payout = 2
Set zone payout =
Set match payout = 5
Set team/pairs payout = 3

Section Id	Zone	Section Label	Display Section	Section River
1	A	Martham Candle Dyke/Boat Green	Green 1	Thurne
2	A	Martham Ronds	Red 1	Thurne
3	B	Martham High's Mill	Green 2	Thurne
4	B	Potter Heigham Stagings	Red 2	Thurne
5	C	Womack Bank B	Red 3	Thurne
6	C	Cold Harbour Bank B	Green 3	Thurne
7	D	St Benets Front of Abbey	Red 4	Bure
8	D	St Benets Black Sign	Green 4	Bure

Anglers worksheet

Enter the anglers' names and, if required, their Team or Pairing names and Team League.

Note Angler, Team and Pairing names are especially important when the match is part of a multiple day/round event. Any change to these names over the match series will cause the Series/League overall result to be incorrect.

	A	B	C	D	E
1	Angler A	Pairs B	League C	D	Match Entrants = 51
2	Alan Dorrian	Alan Dorrian & John Southgate			
3	John Southgate	Alan Dorrian & John Southgate

51	Tony Curtis	Tony Curtis & Lee Lawrence			
52	Martin Johnson				
53					
54					
55					
56					

← Add individual anglers at end of list, leave the Pairs column empty.
You can exclude Individuals from the Pairs points scoring when you enter the individual angler's result.

REF	GUIDANCE	DROPDOWN SOURCE
A	Set the Angler's name; this list will be used to create a dropdown list for use on the Result Data worksheet. This information can be printed via the Print Anglers worksheet.	
B	For Pairs or Team matches set the Pairing or Team name. Note this information will be used as the key for creating the Pairs/Teams result for this match (see League 1 Result , League 2 Result , Display League 1 Result and Display League 2 Result worksheets). This information can be printed via the Print Anglers worksheet.	

REF	GUIDANCE	DROPDOWN SOURCE
C	For Team matches set the League names. Note this information will be used as the key for displaying the Pairs/Teams result for this match (see League 1 Result, League 2 Result, Display League 1 Result and Display League 2 Result worksheets). This information can be printed via the Print Anglers worksheet.	List of leagues sourced from Table in the Parameters worksheet.
D	This calculation counts the anglers' names.	

Print Anglers worksheet

This worksheet formats the list of anglers' names into three columns and enables up to 120 names to be printed on a single sheet. This worksheet also displays the chosen match and date as set on the **Match Info** worksheet.

REF	GUIDANCE	DROPDOWN SOURCE
A	Section Id as per table in Match Info worksheet.	
B	Peg number	
C	Name of angler from dropdown list.	List of names sourced from list in the Anglers worksheet.
D	Pounds component of angler's weight	
E	Ounces component of angler's weight	
F	Drams component of angler's weight	
G	Optional: Section points listed on score sheet. Any values entered here will be cross-checked against the calculated section points. Any discrepancies will be flagged using cell shading.	
H	Optional: Exclude an angler from the points calculations. This enables anglers to participate in individual matches for pools money on the day without impacting the points.	

League 1 or 2 worksheets

These sheets are only required for pairs & teams matches and multiple day individual matches.

Guide to the NDAA Match and Series Result templates

This information will be listed by angler's names for individual matches, pairing names for pairs matches or team names for team matches.

The League 2 worksheet is only applicable for team events with two leagues.

The data in these sheets will be copied to an overall result workbook for multiple day events.

Set League value

This information is only required for team matches; red shading of the League value is used to denote when it is expected.

Display Result A-D worksheet

Several worksheets have been provided to enable the match result to be displayed. Each sheet can be configured to display up to SIX sections.

Note that the number of sections to be displayed on a sheet will depend on the size of resulting image to be posted on Facebook.

See Appendix A for previous examples of display results.

[illegible]

Select sections

Select sections from dropdown list in top left corner:

	A	B
1	Set sections to display	
2		
3		
4		
5		
6		
7		

Hide rows and columns

Once sections to display have been set, need to hide empty or unrequired rows and columns as indicated by the red shading.

Select the rows to hide: Click the first row number, hold the SHIFT key down and click the last consecutive shaded row number to select all of them.

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O

Once rows are selected, as per above image, right click to open menu options and select **Hide**:

Repeat the process until all the red shaded rows are hidden.

Select the columns to hide: Click the first column number, hold the SHIFT key down and click the last consecutive shaded column number to select all of them.

Once columns are selected, as per above image, right click to open menu options and select **Hide**:

Copy result for Facebook

The worksheet should now display just the required result information and is ready to create an image for uploading to Facebook.

Select the displayed result; Click the top left cell (A in the image below), hold the SHIFT key down and click the bottom right cell (B) to select the results to be copied.

Copy the result for Facebook

Select the displayed result; Click the top left cell, hold the SHIFT key down and click the bottom right cell to select the results to be copied.

Select **Copy** > **Copy as Picture** from menu ribbon to open the Copy Picture menu; select **As shown on screen** and **Picture** format and click **OK**.

As this worksheet has been protected, you will need to go the **Paste League results** worksheet. Select a cell and **Paste** (CTRL + V) the copied image.

Click on the pasted image and right click, to open the options menu, and select **Save as Picture...**

Save picture ready to be uploaded to Facebook.

Repeat the process if you want to copy the rankings. Recommend copying groups of 15 to ensure text in image is readable when posted on Facebook.

The screenshot shows the Microsoft Excel interface with the 'Home' tab selected. A table of match rankings is visible, titled 'Norwich and District Anglers' Association 2025 Pairs League Round 6 Match Rankings (Section points)'. The table has four columns: 'Pos', 'Pairing', 'Section Points', and 'Weight'. A 'Copy as Picture...' menu is open over the table, and a 'Copy Picture' dialog box is also visible, showing options for appearance and format.

Pos	Pairing	Section Points	Weight
1st	Barry Oliver & Mark Murdoch	3	48-14
2nd	Colin Blake & Robert Houlding	5	51-05
3rd	Kevin Fuller & Robert Hubbard
