

# Guide to the NDAA Match and Series result templates

## Introduction

There are two templates associated with NDAA match results. The first template is used to capture the result of a specific NDAA match. This template provides various layouts associated with displaying the result on Facebook and a summary of the match result for input into the second result template which captures the result of a series of matches.

Both templates are Microsoft 365 Excel spreadsheets which will be shared via OneDrive.

Both templates have been defaulted to be read only to ensure they are not overwritten.

Please use **Save As** to copy the template into a file associated with the specific NDAA match e.g. *2026 Pairs League R1.xlsx*, *2026 Marbella Cup.xlsx*...

or the specific Series result e.g. *2026 Pairs League*, *2026 Pairs Festival*, *2026 Three Rivers Festival*...

This guide explains how to use each spreadsheet with instructions for each of the worksheets, within each spreadsheet, shown in the expected order of use.

## Match result template

### Quick guide to the match result template

## Match Info worksheet

This worksheet captures information about the required NDAA match. This sheet has two groupings of data:

- the information relating to the match and its scoring
- the sections to be used in the match.

The following sections describe these groupings and their purpose.

### Match information

|          |                          |                      |
|----------|--------------------------|----------------------|
| <b>A</b> | Select match             | Pairs League Round 6 |
| <b>B</b> | Date                     | 21 August 2025       |
| <b>C</b> | Match type               | Pairs                |
| <b>D</b> | Series instance          | Round 6              |
| <b>E</b> | Zone count               | 2                    |
| <b>F</b> | Set team ranking basis = | Section              |
| <b>G</b> | Set max section points = | 7                    |
| <b>H</b> | Set max zone points =    |                      |
| <b>I</b> | Set section payout =     | 2                    |
| <b>J</b> | Set zone payout =        |                      |
| <b>K</b> | Set match payout =       | 5                    |
| <b>L</b> | Set team/pairs payout =  | 4                    |

| REF      | GUIDANCE                                                                                                                                                                                                                                                   | DROPDOWN SOURCE                                                                   |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|
| <b>A</b> | Select the required match from the dropdown list.                                                                                                                                                                                                          | List of matches sourced from Table in the <b>Parameters</b> worksheet.            |
| <b>B</b> | Date of match populated from data selected in <b>A</b> .                                                                                                                                                                                                   | Date of match sourced from Match List Table in the <b>Parameters</b> worksheet.   |
| <b>C</b> | Match type populated from data selected in <b>A</b> .                                                                                                                                                                                                      | Match type sourced from Match List Table in the <b>Parameters</b> worksheet.      |
| <b>D</b> | Match instance populated from data selected in <b>A</b> . Used to determine whether max section points should be set.                                                                                                                                      | Match instance sourced from Match List Table in the <b>Parameters</b> worksheet.  |
| <b>E</b> | Zone count derived from sections (see next section).<br><br>Used to determine whether to Hide zone column on Display Result A-D worksheets.                                                                                                                |                                                                                   |
| <b>F</b> | Select team ranking basis from dropdown list; choose from section, zone or weight.<br><br>This data is used to determine the Team/Pairs placings for this match. Note that this may differ from the basis used to score rankings across the series/league. | List of team ranking bases sourced from Table in the <b>Parameters</b> worksheet. |

## Anglers worksheet

Enter the anglers' names and, if required, their Team or Pairing names and Team League.

Note Angler, Team and Pairing names are especially important when the match is part of a multiple day/round event. Any change to these names over the match series will cause the Series/League overall result to be incorrect.

|    | A               | B                             | C               | D        | E                   |

## Results Data worksheet

The results capture the weigh sheets for the given match.

The columns shaded in green are mandatory and the columns shaded in yellow are optional.

The columns shaded in blue contain the various look-up and calculation functions and should not be overwritten.

| G   | Optional: Section points listed on score sheet.<br><br>Any values entered here will be cross-checked against the calculated section points. Any discrepancies will be flagged using cell shading. |                                                                  |
| H   | Optional: Exclude an angler from the points calculations.<br><br>This enables anglers to participate in individual matches for pools money on the day without impacting the points.               |                                                                  |

## League 1 or 2 worksheets

These sheets are only required for pairs & teams matches and multiple day individual matches.

## Guide to the NDAA Match and Series Result templates

This information will be listed by angler's names for individual matches, pairing names for pairs matches or team names for team matches.

The League 2 worksheet is only applicable for team events with two leagues.

The data in these sheets will be copied to an overall result workbook for multiple day events.

### Set League value

This information is only required for team matches; red shading of the League value is used to denote when it is expected.

## Display Result A-D worksheet

Several worksheets have been provided to enable the match result to be displayed. Each sheet can be configured to display up to SIX sections.

Note that the number of sections to be displayed on a sheet will depend on the size of resulting image to be posted on Facebook.

See Appendix A for previous examples of display results.

[illegible]

## Select sections

Select sections from dropdown list in top left corner:

|   | A                       | B |
|---|-------------------------|---|
| 1 | Set sections to display |   |
| 2 |                         |   |
| 3 |                         |   |
| 4 |                         |   |
| 5 |                         |   |
| 6 |                         |   |
| 7 |                         |   |

## Hide rows and columns

Once sections to display have been set, need to hide empty or unrequired rows and columns as indicated by the red shading.

Select the rows to hide: Click the first-row number, hold the SHIFT key down and click the last consecutive shaded row number to select all of them.

Once rows are selected, as per above image, right click to open menu options and select **Hide**:

Repeat the process until all the red shaded rows are hidden.

## Guide to the NDAA Match and Series Result templates

Select the columns to hide: Click the first column number, hold the SHIFT key down and click the last consecutive shaded column number to select all of them.

Once columns are selected, as per above image, right click to open menu options and select **Hide**:

Repeat the process until all the red shaded columns are hidden.

## Guide to the NDAA Match and Series Result templates

Select an empty white cell at top of the Display Results worksheet and **Paste** (CTRL + V) the copied image.

Click on the pasted image and right click, to open the options menu, and select **Save as Picture...**

Save picture ready to be uploaded to Facebook.

## Display League 1 Result / Display League 2 Result

The Display League worksheets are used to display the League sheet results. The sheets provide both the top anglers/pairs/teams in the match but also the top 45 rankings in the match.

## Copy the result for Facebook

Select the displayed result; Click the top left cell, hold the SHIFT key down and click the bottom right cell to select the results to be copied.

Select **Copy** > **Copy as Picture** from menu ribbon to open the Copy Picture menu; select **As shown on screen** and **Picture** format and click **OK**.

As this worksheet has been protected, you will need to go the **Paste League results** worksheet. Select a cell and **Paste** (CTRL + V) the copied image.

Click on the pasted image and right click, to open the options menu, and select **Save as Picture...**

Save picture ready to be uploaded to Facebook.

Repeat the process if you want to copy the rankings. Recommend copying groups of 15 to ensure text in image is readable when posted on Facebook.

The screenshot shows the Microsoft Excel interface with the 'Home' tab selected. A table of match rankings is highlighted in the worksheet. The table is titled 'Norwich and District Anglers' Association 2025 Pairs League Round 6 Match Rankings (Section points)'. The table has four columns: 'Pos', 'Pairing', 'Section Points', and 'Weight'. The data is as follows:

| Pos  | Pairing                       | Section Points | Weight |
|------|-------------------------------|----------------|--------|
| 1st  | Barry Oliver & Mark Murdoch   | 3              | 48-14  |
| 2nd  | Colin Blake & Robert Houlding | 5              | 51-05  |
| 3rd  | Kevin Fuller & Robert Hubbard |                |        |
| 4th  | Mark Banks & Alan Luetchford  |                |        |
| 5th  | Paul Chambers & Karl Dowse    |                |        |
| 6th  | Matt Corne & Dave Gooch       |                |        |
| 7th  | Billy Hughes & Steve O'Rourke |                |        |
| 8th  | Bob Nudd & John Taylor        |                |        |
| 9th  | Daren Mallett & Gary Mallett  |                |        |
| 10th | Ian Holmes & Terry Smith      |                |        |
| 11th | Mark Campion & Trevor Stacey  | 7              | 34-08  |
| 12th | Paul Abbott & Steve Clark     | 7              | 29-01  |
| 13th | Mark Haverson & Paul Hudson   | 9              | 42-04  |
| 14th | Robin Austrin & Ian Bailey    | 10             | 26-13  |
| 15th | Alan Dorrian & John Southgate | 11             | 36-00  |

The 'Copy Picture' dialog box is open, showing the 'Appearance' section with 'As shown on screen' selected, and the 'Format' section with 'Picture' selected. The 'OK' button is highlighted.

## Series result template

The series result template collates up to TEN series match results to calculate the overall series result.

Please note if there are multiple Leagues associated with a series, then you will need to create a series result per league.

For example, *2026 Teams of 4 Blue.xlsx* and *2026 Teams of 4 Yellow.xlsx*

### Quick guide to the series result template

## Match Info worksheet

This worksheet captures information about the required NDAA match series.

## R1 to R10 result worksheets

These worksheets capture the discrete match results associated with the match series.

Copy the League 1 (or League 2) result worksheet from the match result spreadsheet, only require columns A-AK, into the relevant R1-R10 result worksheet.

Copy using **Paste > Paste Values only**:

Or shortcut **CTRL+SHIFT+V**

|    | A                              | B      | C                 | D           | E | F | G          | H          | I         | J          | K          | L         | M          | N          | O         | P          | Q          |
